Boosted Creatures

The server chooses monsters from a list every two hours and marks them as boosted monsters.
The boosted monsters are split into 4 categories: easy, medium, hard and nightmare. The server will choose monsters for each category.
Additionally for spawns with multiple monsters the server will choose multiple monsters for the tier they are in.
Killing the boosted monsters will yield additional experience points and loot.
Players will receive a notification with the list of boosted monsters on login and whenever they are rerolled.
