Shrines

Shrines randomly appear on spawns and grant a random buff when used, the shrines will disappear on use.

You will never find more than a single shrine in a certain spawn but the location of the shrine may vary.

You are also not guaranteed to always find a shrine in a spawn as the chosen locations are random. Shrines will have an exclamation mark icon above them to make them easier to notice and will display a tooltip with the name and effects when hovered with the mouse.
